

THE INSTALLATION SOLUTION FOR 4800 SERIES STRIKES

NEW

TRINE
ACCESS TECHNOLOGY

4850-ITL

4800 Series

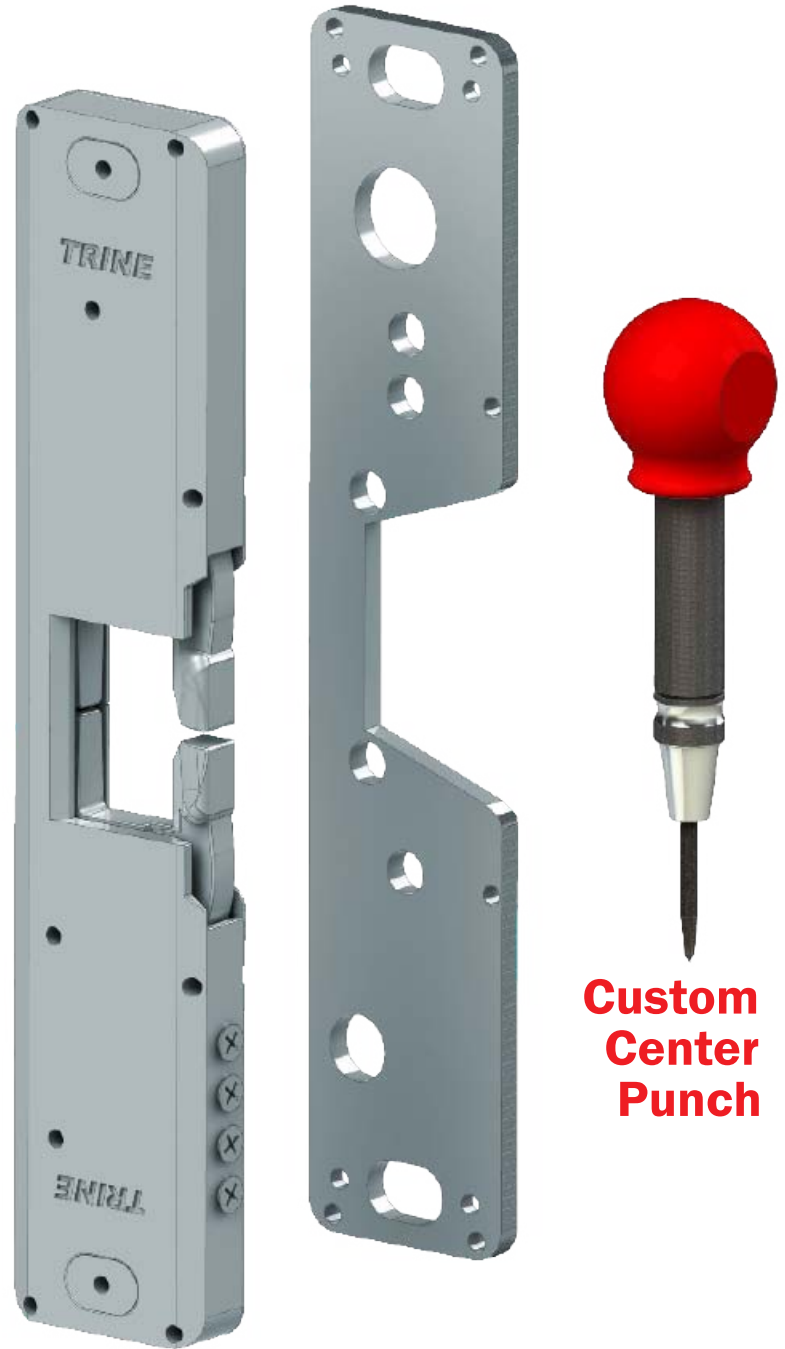

“Feel” the door with the strike on the frame then drill.

- 4850-ITL installation tool has magnets installed which allows it to attach to metal frames, allowing you to:
 - Adjust and center the strike before ever drilling a hole eliminating the mistakes.
 - Increase your installation speed on those larger jobs.
- 1/4” Spacer included, so the tool becomes 3/4” thick, and is also magnetized. (screws on side anchor the spacer to the tool)
- Included custom center punch makes precise marks on the frame for drilling. Marks all Anchor pin holes, mounting screws, power, and optional LB sensor.
- Patent Pending

4850-ITL

To get your 4850-ITL, contact your local Trine Representative or call the factory direct at:
